MOUNTAIN BIKE ADVENTURES

Apollo EON Commuter (E bike)

Australian owned and designed, Apollo's E-bike range is designed to appeal to both passionate commuters looking to get more out of their bike experience, as well as more casual riders, who may prefer a less active approach but still enjoy the sights and sounds along the way.

The Apolo EON is available as a option to ride on our Sip n Cycle winery tour, it is a eco friendly electric assisted bike. It has an electric motor you still need to use gears and pedal like a regular bike but the motor will help you by adding torque making all of your pedalling easier so you will barely break a sweat riding any hills on route to visit our wineries..

Focus Whistler 2017

Ready to Shred! Straight from the box these bikes were ready to roll Purist, dynamic and fully committed to propulsion – that's what all FOCUS hardtails are all about. Dispensing with rear suspension means less weight.. This uniqueness is also reflected in the handling of these bikes – maneuverable, nippy and agile. The Whistler aluminum frame ensures speed and agility at every track.

- Small medium and Large frames 27.5 "

It's the essence of cross-country riding itself, highly maneuverable and built to put your power to the ground. Lightweight, fast and exceptionally stable, GT built the Zaskar around the lean 27.5 Speed Metal Ultra hydroformed alloy frame with Triple Triangle construction. Up front a RockShox 30 Silver TK 27.5 Solo Air fork, with 100mm of travel, smooths out the course. The fork also includes rebound adjust, PopLoc remote lockout and a tapered alloy steerer. The rugged, dependable drivetrain features Shimano's Deore RapidFire shifters, crankset matched to a Shadow Plus rear derailleur. Some serious stopping power is provided by Shimano hydraulic brakes with 180mm front and 160mm rear Centerlock Rotors. Delivering the perfect blend of cross-country handling and quick acceleration is provided by Alex DP21, double wall rims with Centerlock discs and quick release skewers. Schwalbe Racing Ralph 27.5X2.25" tires with folding bead provide the kind of aggressive bite you want when you fly cross country.

We customised these bikes to make a 1 X 10 drive train, with raceface narrow wide front cog. Now perfect for riding our local trails.
